

Topic: Meet Faraday and Maxwell

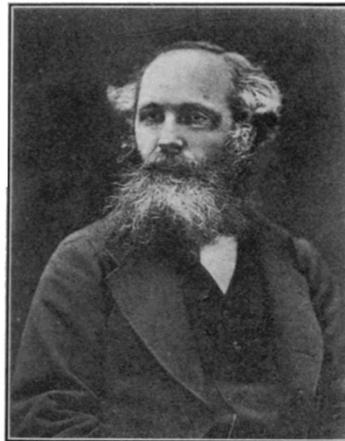

Description: Join us to hear about the two greatest scientists Michael Faraday and James Maxwell who were also devout Christians. Besides their individual accomplishments, they both partnered in the discovery that light is electromagnetic in nature.

Suzanne Shera readily shares about them with family, friends, and students, as well as in her book “*Lightlab*”. It is her wish to inform you as well about these two men whose love for God enhanced, rather than hindered, their understanding of the physical world.

“The book of nature, which we have to read, is written by the finger of God.”

I shall be with Christ, and that is enough

“I think men of science as well as other men need to learn from Christ, and I think Christians whose minds are scientific are bound to study science that their view of the glory of God may be as extensive as their being is capable.”
